RMIT Classification: Trusted

COSC2626/2640 Overview

Dr. Qiang Fu
School of computing technologies

RMIT UNIVERSITY

Course Overview

- Course information
  - People/times/venues
  - Course objectives, prerequisites, texts/resources, assessments, policies
- How to succeed and get help
- Some important info.
  - Set up your AWS canvas shell account (this is separate from your RMIT canvas shell)
  - COSC2626 course Canvas shell shared between UG class (COSC2626) and PG class (COSC2640)
- Appointing class reps

People

- Course coordinator and lecturer
  - Dr. Qiang Fu: qiang.fu@rmit.edu.au
  - Dr. Vu Huy Mai: vuhuy.mai@rmit.edu.au

- Tutors
  - Dr. Ying Zhang: ying.zhang3@rmit.edu.au
  - Tim Lo: tim.lo@rmit.edu.au
  - Yiwei Zhong: yiwei.zhong@rmit.edu.au
  - Khang Vo: khang.vo@rmit.edu.au

Important Times

- Check your timetable for your lecture and tutorial sessions
- Canvas → Modules → Class Timetable

Course Objectives

- The course is about:
  - How to use and build cloud
  - How to develop a cloud application using AWS services
  - The enabling technologies building the cloud
  - Details on course guide

- Note:
  - This is a generic cloud computing course
  - NOT an AWS course (AWS is just a tool)
  - Interested in AWS → Cloud Foundation (COSC2757)

Pre-requisites and assumed knowledge

- Good knowledge in programming (This is a MUST!)
- Good knowledge in Java/PHP/Python or any other programming language supported by AWS
  - We use Java in the exercises
- Basic knowledge in computer networks, operating systems and computer architecture
  - We do not assume you have this

Course Texts

- No prescribed texts
- References (Canvas → Syllabus, Course Guide)
  - Cloud Computing: Theory and Practice
  - The Cloud Computing Book: The Future of Computing Explained
  - Learning Amazon Web Services (AWS): A Hands-On Guide to the Fundamentals of AWS Cloud
- Good books about
  - Computer networks
  - Operating systems
  - Computer architecture

On-line Resources

- Everything is on Canvas including both RMIT and AWS Canvas shells and AWS documentation
- Online sessions will be carried out via Collaborate Ultra on Canvas.

Assessment

- Fortnightly quizzes
  - Weight: 10%
- Assignment 1: written assignment (group or individual)
  - Weight: 10%
  - Due: Sun. Week 4
- Assignment 2: project (group or individual)
  - Weight: 40%
  - Due: Fri. Week 9
  - **Demo marking.** You must attend the demo to get marks – no demo, no marks!
- Assignment 3: written assignment (individual)
  - Weight: 40%
  - Due: Fri. Week 13

Rules and Policies

- The usual rules and policies apply.
- Information is available on the course web page.
- Plagiarism (cheating) – a big no-no!
  - Example: copy directly from ChatGPT or other sources

How to succeed and get Help

- Lectures
  - Attend lectures, watch lecture recordings, or self-study the materials if you are confident
  - You are encouraged to ask questions
  - Try to get as much as possible from the lectures

  - Materials available a few days earlier (may get updated after the lectures)

How to succeed and get Help

- Exercises (if any) / AWS exercises
  - AWS exercises are designed to help you develop hands-on skills and do the project.
  - Steps of doing these exercises are provided in the exercise notes.
  - You need to get your hands dirty, going through these exercises before coming to the Tutotial sessions when you need help.

How to succeed and get Help

- Tutorial sessions
  - The primary venue to interact with teaching staff for help
  - If you have trouble going through the exercises or understanding the lecture materials, you are encouraged to attend these sessions to get help
  - The attendance is optional
  - You may attend any of these sessions that suits you

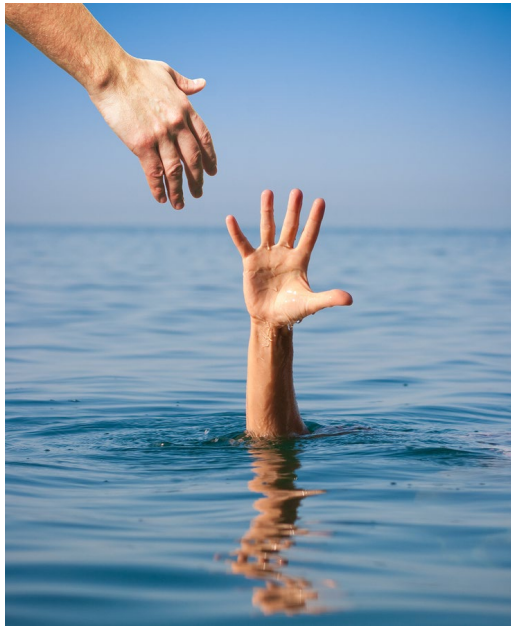
How to succeed and get Help

- Canvas Discussion Forums
  - Designed for the discussions among students to create the vibe of a community
  - Moderated and facilitated by teaching staff
  - If any clarifications are needed, teaching staff will step in.

  - Note that teaching staff is not in a position to help interpret assignment questions. It is part of your job.

How to succeed and get Help

- Don’t hesitate to use all these channels if you need help
- You will be fine!



Some important things to know

- We will send out AWS invites soon if not already. If you enrolled late, please contact your Tutorial session tutors to get an invite.
  - You will need set up a separate AWS account for AWS Canvas shell (this is not your RMIT Canvas shell account).

- We use COSC2626 course Canvas shell, which is shared between UG class (COSC2626) and PG class (COSC2640)
  - Assessments 2 and 3 have one version for COSC2626 and another for COSC2640.

Appointing Class Representatives (Class Reps)

- Class Reps are expected to liaise with the Course Coordinator, lecturer, and the class to support and improve students' learning experiences in this course
- Elected

- Please send me an email to confirm
