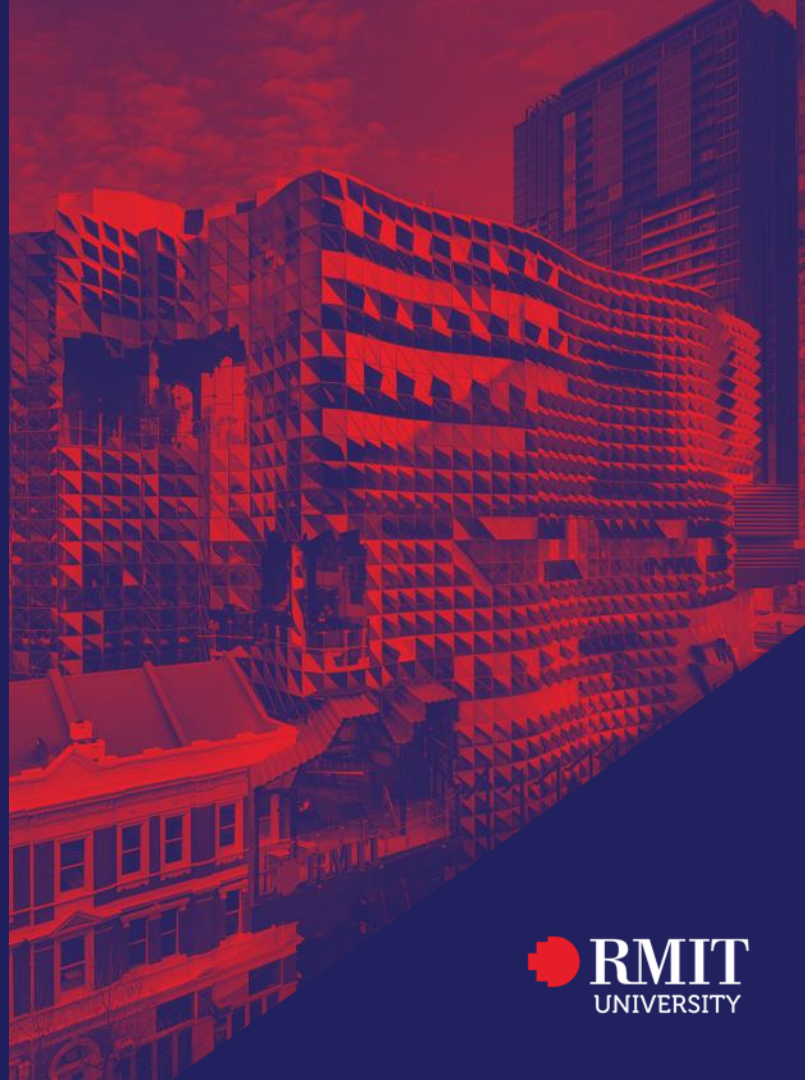
ISYS 1108 / 3474 Software Engineering Project Management

Week 2: Workshop

Dr Maria Spichkova

Senior Lecturer in Software Engineering

What's next...



RMIT UNIVERSITY

Acknowledgement of Country

RMIT University acknowledges the people of the Woi wurrung and Boon wurrung language groups of the eastern Kulin Nation on whose unceded lands we conduct the business of the University.

RMIT University respectfully acknowledges their Ancestors and Elders, past and present.

RMIT also acknowledges the Traditional Custodians and their Ancestors of the lands and waters across Australia where we conduct our business.

Our plan for this session

- 😊 Orga points: What to expect from workshops and tutors
- 😊 Project charter vs. Vision & Scope document
- 😊 Work Breakdown Structure (WBS) in traditional methodologies

What to expect from your workshop and tutors?

Each workshop will have a number of activities, where we will discuss practical case studies and examples.

Workshop sessions are not recorded, but we will share with you workshop slides and (for some tasks) sample solutions.

We will discuss here sample challenges and (after announcement of marks) correct solutions of actual challenges.

If you have questions on your assignments (need more feedback or have questions on your mark) – ask your tutor **at the workshop**! We will allocate a part of the sessions exactly to these activities.

Activity 1: Introduce yourself ☺

Duration: approx. 15 minutes

Who is your tutor?

Who are the students in the class?

Note: You will have a team-based assignment!

The teams will be formed within the workshop sessions by the tutors and will typically have **4-5 members**.

All team members should be from the same workshop class as per official enrolments.

Activity 2:
Let’s discuss what to use – PC or V&S?

Duration: approx. 30 minutes

Project Charter and Vision & Scope document are very similar.

Even when their structure looks different, they have similar goals.

Which of the documents would you personally prefer to have for your project?

What writing styles are easier for you to read?

Have you checked the Week 1’s materials on this topic? If not, then please do it now and ask questions if something is unclear!

V&S Document vs. Project Charter

Vision & Scope document:

1. **Business Requirements**
   1) Background
   2) Business Opportunity
   3) Business Objectives and Success Criteria
   4) Business Assumptions and Dependencies
   5) Business Risks
2. **Vision of the Solution**
   1) Vision Statement
   2) Major Features
3. **Scope and Limitations**
   1) Scope of Initial and Subsequent Releases
   2) Limitations and Exclusions
4. **Business Context**
   1) Stakeholder Profiles
   2) Project Priorities
   3) Operating Environment

Project Charter (PMBOK)

1. Purpose *
2. Objectives *
3. Overview *
4. Schedules *
5. Resource requirements
6. Personnel and stakeholders *
7. Evaluation methods
8. Risk management *

Activity 3: Project charter for LOS case study

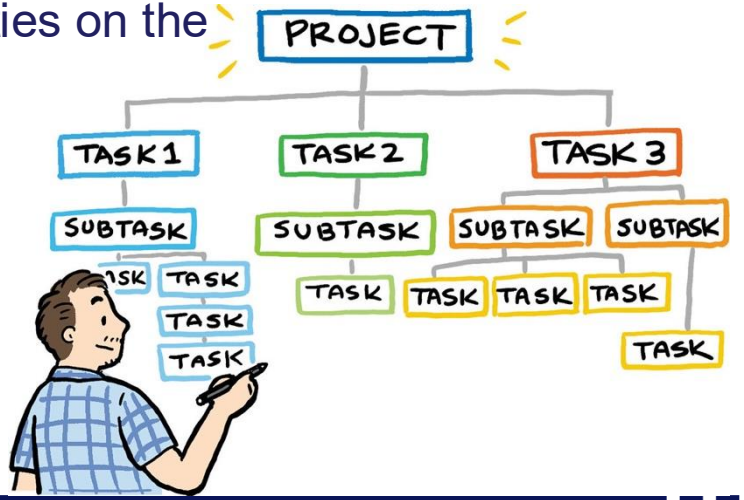
Duration: approx. 30 minutes

The Project Charter for LOS was created under an assumption that the project will be conducted using Agile approach.

If we would plan for a traditional project, the WBS (*work breakdown structure*) must be created in a different way.

Discuss with the tutor the differences and similarities on the basis of LOS case study.

Have you watched the pre-recorded videos on this topic?



Activity 4: WBS

Templates are available in Canvas:
Modules → Templates, Tools, Team Allocation → Useful templates

Duration: approx. 30 minutes

Scenario: Assume that the LOS project should be conducted using a **traditional methodology, within 6 months (1 May – 31 October)**.

Task 1: Discuss with the tutor what information is missing in the scenario to start creating WBS. Extend the scenario based on this discussion.

Task 2: Create a WBS with at least two levels for the case

- ✓ Think of general steps that may be needed!
- ✓ Make sure that you included predecessor, task durations, resources and milestones.
- ✓ The tasks must be at least two levelled.
