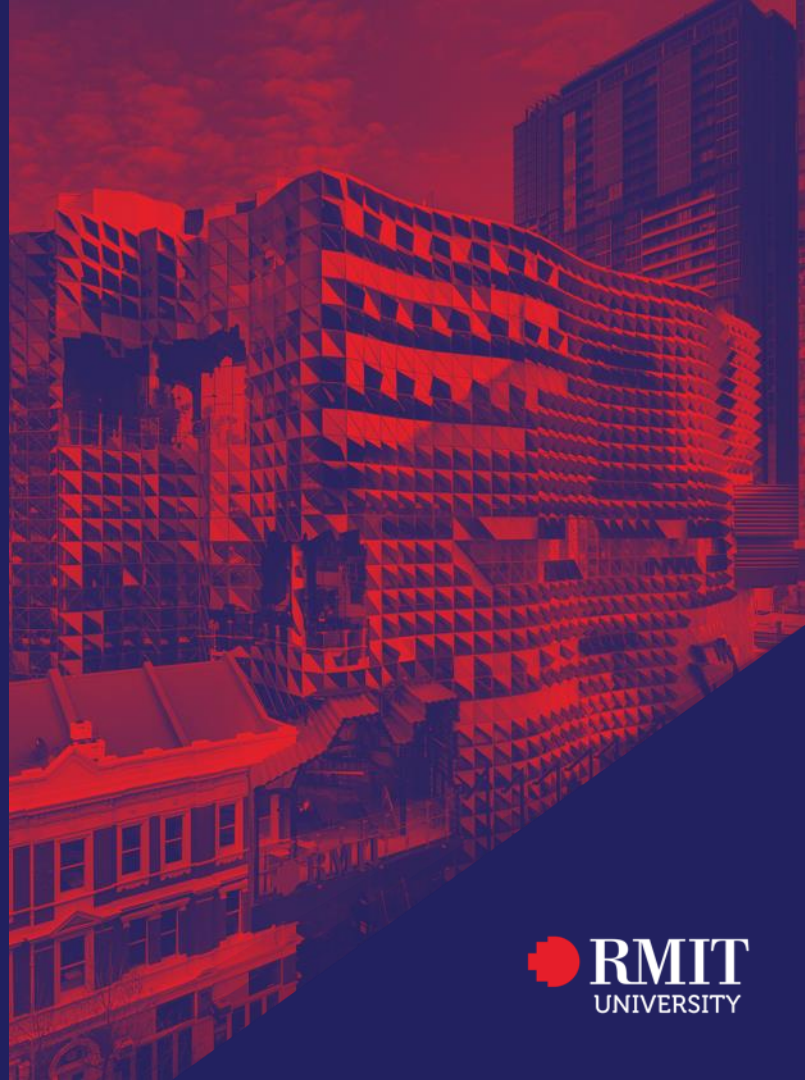
ISYS 1108 / 3474 Software Engineering Project Management

Week 4: Workshop

Dr Maria Spichkova

Senior Lecturer in Software Engineering

What's next...



RMIT UNIVERSITY

Acknowledgement of Country

RMIT University acknowledges the people of the Woi wurrung and Boon wurrung language groups of the eastern Kulin Nation on whose unceded lands we conduct the business of the University.

RMIT University respectfully acknowledges their Ancestors and Elders, past and present.

RMIT also acknowledges the Traditional Custodians and their Ancestors of the lands and waters across Australia where we conduct our business.

Our plan for this session

- 😊 Product backlog for the Hospital System Scenario
- 😊 Acceptance criteria
- 😊 Second Sample for SE Challenge 1
- 😊 Check: Do you have a team?

Hospital System scenario

This week focus on the following case study:
Hospital case study, see
SEPM_Week_4_Hospital_scenario.pdf
in Modules → Week 4 - Lectorials and Workshops

A team created a draft of the *Product Backlog* for the above product, but it contains mistakes – our next activity will focus on analysing and fixing them.
For this analysis and correction we need to know the scenario.

Then we will go through the product backlog together, step by step using the checklist.

Note: a similar type of analysis will be required in one of the tasks of your Assignment 3 (On-demand interview)

Detailed checklist to analyse the product backlog

1. Are the PBI IDs unique?
2. Do the PBI IDs have a reasonable format?
3. Do PBI have a correct user story format (As a… I want to … so that …)?
4. Are the items in the product backlog presented in a correct order?
5. Are the priorities correct wrt. the *scenario?*
6. Are the numbers of story points allocated to each PBI reasonable?
7. Is the syntax of efforts correct (Fibonacci numbers are used)?
8. Are/Is the DoD(s) reasonable?
9. Are there any contradictions among the PBIs or within the PBIs?
10. Is the product backlog complete?
11. Are all the PBIs in scope?

These two points will be discussed on Week 5

Activity 1: Product backlog – PBI IDs

Duration: approx. 5 minutes

Open the document
SEPM_Week_4_PB_WithMistakes.pdf
in Modules → Week 4 - Lectorials and Workshops

Let's answer the following questions of the checklist and discuss required changes:

- Are the PBI IDs unique?
- Do the PBI IDs have a reasonable format?

Activity 2: Product backlog – User stories

Duration: approx. 10 minutes

Open the document
SEPM_Week_4_PB_WithMistakes.pdf
in Modules → Week 4 - Lectorials and Workshops

Let's answer the following question of the checklist and discuss required changes:

- Do PBI have a correct user story format (As a… I want to … so that …)?

Activity to describe the required functionality (use VERBS!)

Role (user type)

Justification, why this functionality is needed

Activity 3: Product backlog – Priorities

Duration: approx. 5 minutes

Open the document
SEPM_Week_4_PB_WithMistakes.pdf
in Modules → Week 4 - Lectorials and Workshops

Let's answer the following questions of the checklist and discuss required changes:

- Are the items in the product backlog presented in a correct order?
- Are the priorities correct wrt. the *scenario?*

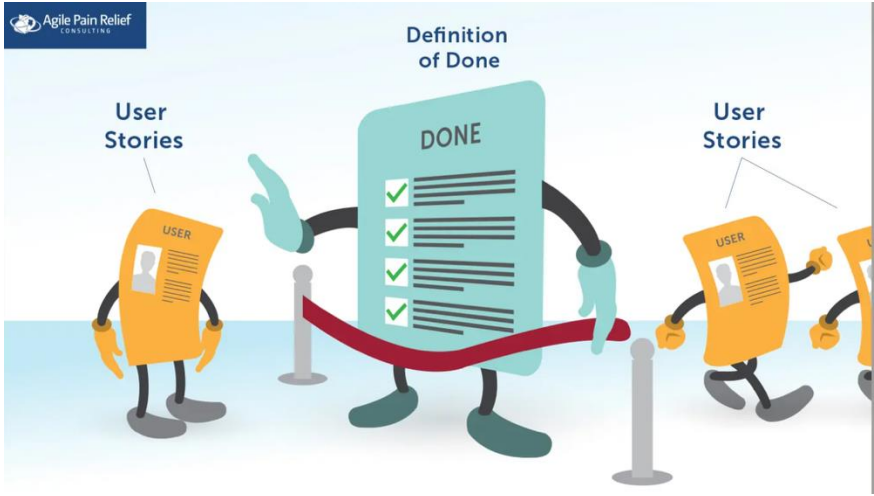
Activity 4: Product backlog – DoD

Duration: approx. 5 minutes

Open the document
SEPM_Week_4_PB_WithMistakes.pdf
in Modules → Week 4 - Lectorials and Workshops

Let's answer the following question of the checklist and discuss required changes:

- Are/Is the DoD(s) reasonable?



Activity 5: Product backlog – Scope

Duration: approx. 15 minutes

Open the document
SEPM_Week_4_PB_WithMistakes.pdf
in Modules → Week 4 - Lectorials and Workshops

Let's answer the following questions of the checklist and discuss required changes:

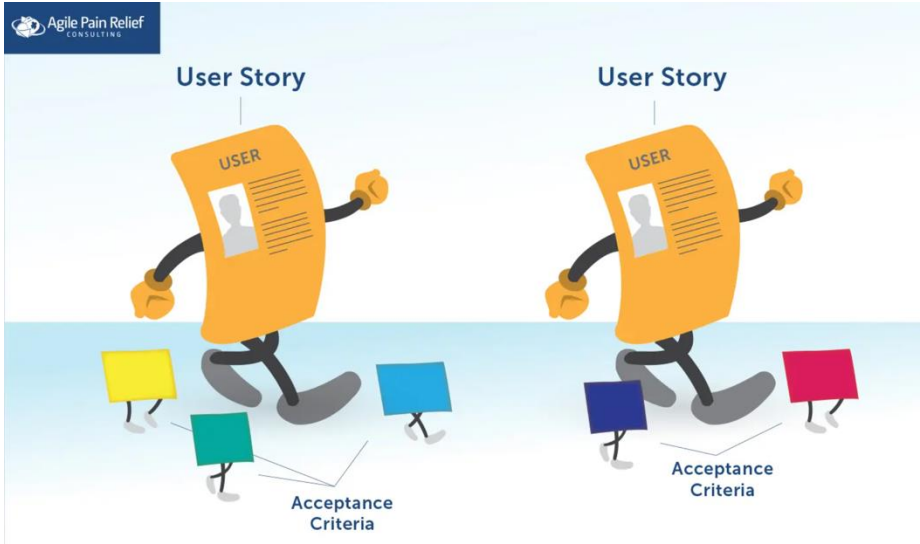
- Are there any contradictions among the PBIs or within the PBIs?
- Is the product backlog complete?
- Are all the PBIs in scope?

Activity 6: Acceptance Criteria

Duration: approx. 15 minutes

Create acceptance criteria for the following user story:

PBI 17. As a doctor/nurse, I want to send instant messages to other doctors and nurses, so that our communication is faster



Activity 7: Acceptance Criteria

Duration: approx. 15 minutes

Create acceptance criteria for the following user story and discuss your results with the tutor:

PBI 18. As a doctor/nurse, I want to receive instant messages to other doctors and nurses, so that our communication is faster.

Activity 8: Acceptance Criteria

Duration: approx. 5 minutes

Create acceptance criteria for the following user story and discuss your results with the tutor:

PBI 19. As a doctor/nurse, I want to read old instant message conversations, so that I can better recall the reasons for the decisions made.

Activity 9: Check – Do you have a team?

Duration: approx. 5 minutes

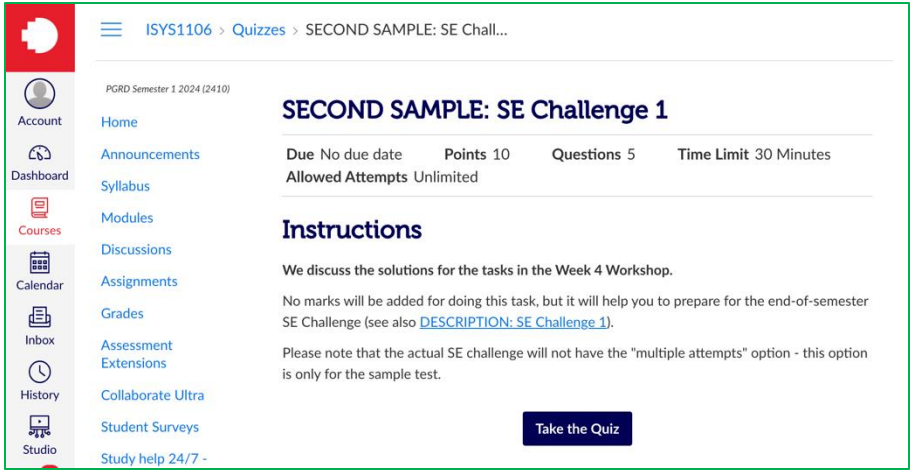
The teams will typically have **4-5 members**.

All team members should be from the same workshop class as per official enrolments.

Activity 10: Second Sample for SE Challenge 1?

Duration: approx. 30 minutes

If you have any questions on SE Challenge 1, this is the last opportunity to ask them to the tutor ☺

Have you checked the Samples?
In Week 2 Workshop, we discussed the first Sample. Do you have any questions on it?


Do you have any questions on the second Sample?
